About Me

Final-year Computer Science Engineering undergraduate specializing in AI & Machine Learning, with strong skills in Python, Machine Learning, Web Development, and Data Analysis. Slightly Experienced in building academic and real-world projects using OpenCV, Data Science Toolkit and Machine Learning.

Technical Skills

Programming Languages: Python, Java (Basics), C, C++ (Basics)

Web Technologies: HTML5, CSS3, JavaScript-ES6 (Basics), Node.js, PHP

Database: MySQL (Basics), MongoDB (Basics)

Machine Learning: Scikit-learn, Pandas, NumPy, OpenCV, Natural Language Processing (NLP)

Tools: Git, GitHub, VS Code, Google's Antigravity, Jupyter Notebook

CS Fundamentals: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOPs, OOAD, Compiler Design

Projects

MedXplain – Explainable AI Healthcare Prediction System | Academic Project 2026

- Designed a multi-disease prediction system supporting diagnosis of 3+ conditions using ML and Explainable AI for transparent clinical decision support.
- Trained and benchmarked 4 ML models — Random Forest, XGBoost, Logistic Regression, and Neural Networks — achieving up to 91% accuracy with F1-Score and ROC-AUC evaluation.
- Applied SHAP and LIME algorithms to generate global and local interpretability explanations, reducing model black-box behavior and improving clinician trust by ~40% in user testing.
- Deployed a responsive Streamlit web application enabling real-time disease prediction, feature importance visualization, and explainability insights for non-technical users.

DeepGuard – Deepfake Detection System | Academic Project 2026

- Architected a multimodal AI deepfake detection system analyzing image, audio, and video streams using CNN, DenseNet121, ResNext50, and LSTM models in PyTorch.
- Engineered weighted ensemble fusion across modalities, achieving 96%+ detection accuracy on benchmark datasets — outperforming single-modality baselines by ~12%.
- Developed and deployed a real-time forensic analysis dashboard using Streamlit and a FastAPI backend, supporting batch and live inference.

NEON FLUX ∞ – Multiplayer Arcade Shooter | Academic Project 2026

- Developed a real-time multiplayer browser game using JavaScript, Node.js, WebSockets, and HTML5 Canvas API, supporting 2+ simultaneous players with low-latency sync.

Climate Data EDA | Academic Project 2025

- Performed exploratory data analysis on climate datasets using Python and NLP techniques, identifying key trends and generating visual insights with Matplotlib

Education

B.E. in Computer Science and Engineering (AI & ML) | SCSVMV University DU,
Kancheepuram, TN 2023 – 2027
CGPA: 8.17 / 10.00

Class XII – MPC | Board of Intermediate Education, Andhra Pradesh 2023
Marks: 851 / 1000 (85.1%)

Class X – SSC | Board of Secondary Education, Andhra Pradesh 2021
Marks: 589 / 600 (98.2%)

Certifications

- Python 101 for Data Science – IBM
- Database Programming with SQL – Oracle Academy
- OpenCV Bootcamp – OpenCV University
- GUVI'S Workshop on "AWS from zero to cloud" – HCL
